

# Attention All Contractors & Accountants

**Worried about the new CIS rules  
and how you will cope?**

Solve your problems with **"CISassist"**

Get your "CIS House" in order now before it's too late!

**CISassist** is a very easy to use software program that will help you cope with the new CIS rules and keep the tax man happy. It is inexpensive and designed specially for construction businesses like yours, and accountants who advise the construction trade.

From April 2007 – just a few short months away – CIS administration is changing.

As a Contractor you *must* comply with the new rules or else, quite simply, you will lose your gross payment certificate (CIS 6) and you will have to pay very high financial **penalties every month** if you don't do everything expected of you. Don't take risks!

As a Contractor from April 2007 you will have to do the following:

- make a monthly return to the Revenue detailing every subby you have used and make a return even if you haven't used any subbies - get it wrong and you will get a fine!
- tell the tax man how much they have earned and how much you have stopped
- check with the taxman before you pay the subbies whether you should pay them gross or net and how much tax you need to stop (the verification process)
- give every subby a monthly payment confirmation containing lots of detail
- make a tax status declaration to the tax man every month confirming your subbies are genuinely self employed – get it wrong and risk a £3,000 fine every month

but.....from April onwards the tax man is scrapping the pre-printed vouchers and **you** will have to do it all yourself! This puts even more pressure on you. Are you ready? Can you cope? Would you like some help? Before it's too late? All this new admin will take up your valuable time so why not use **CISassist** to handle all your CIS legal obligations.

**CISassist** is a very easy to use software program that helps you do everything you need to do, on time every time, so you keep your nose clean and avoid fines.

Who is behind **CISassist**? **CISassist** was developed by **Forbes Computer Systems** with the assistance of **Accountax**. **Forbes** are a hugely respected tax software house who have been writing simple to use tax programs for 14 years. **Accountax** are the UK's leading tax experts on CIS problems including tax status, self employed contracts and CIS 6 refusals. The **Forbes/Accountax** combination is a winning team and **CISassist** is a life saver for all construction firms and their accountants, from the very small to the very large.

.....and **CISassist** is unique because not only will it handle all the form-filling, administration and verification processes for you but it has 4 extra advantages that no other product has:

- **CISassist** tells you accurately whether your subbies are legally and correctly self employed using the Accountax On Line Tax Status Assessment. This means you won't pay penalties because you won't get tax status wrong - you can ensure your subbies are genuinely self employed.
- With **CISassist** you don't have to wait until April 2007 - once you purchase **CISassist** you can do as many dummy runs and as much form-filling practice as you like **before** April 2007 to make sure you are comfortable with everything. This means that you can avoid the last minute panic come April that will catch others out - get ahead of the pack!
- **CISassist** was developed by Forbes together with Accountax and this software **has already been officially recognised by the Inland Revenue**. This means you can rest assured you are dealing with a respected company who have a sound track record. Keep legal with **CISassist**
- **CISassist** will give you reminders to do everything you have to do, on time every time, so you avoid Revenue penalties. **CISassist** is first aid for contractors and accountants.

### *Frequently asked questions*

When is **CISassist** available?

*It is released on October 27<sup>th</sup> 2006 and we offer a 10% early order discount if you place your order before Friday 24<sup>th</sup> November 2006.*

Can I use my existing pay roll software for the new CIS requirements?

*No! Subbies are NOT employees and the new CIS rules require much more than most standard pay roll software delivers. The new CIS rules need new software*
